IT IS TIME TO GET BACK TO BASICS ON THE BORDER

DONNA F. COLTHARP*

When the Trump Administration’s Zero-Tolerance Policy—and the resulting family separations—caught the nation’s attention, I was working as the First Assistant Federal Public Defender in a border district.1 Attorneys in our office represented some of the arrested asylum-seekers, and I naturally had strong feelings about the merits of the policy and the harm it caused.2 But, as our attorneys worked to craft

Before coming to St. Mary’s, she served as an assistant federal public defender in the Western District of Texas and was First Assistant Federal Public Defender in the district from 2013 to 2019. The author dedicates this essay to the defense attorneys who serve immigrant clients in criminal proceedings, as policies shift, and resources dwindle.

legal arguments that could assist their clients both in their criminal cases and in finding their children, I saw that the family separations were part of a broader, systemic crisis.\(^3\) I often thought, during those months, of a conversation I had on a train ride from New York City to Pennsylvania—years before then-candidate Donald Trump announced he would build a wall.\(^4\) A passenger sitting next to me asked me what I did; I told him and said that a large part of my practice involved defending folks accused of reentering the United States without permission.\(^5\) He was in favor of such prosecutions.\(^6\) After all, he said, we only prosecute people with criminal histories, and we do not prosecute people the first time they cross.\(^7\) If you commit a crime, you should get punished. He said, “at least they’re in America. We give them a fair trial.”\(^8\) We talked about that for a while. I told him that an immigrant’s first unauthorized entry is, in fact, a crime, and that thousands of people are prosecuted every year for it.\(^9\) I asked him if he knew that, in many cases, the “criminal

histories” we hear about are just prior immigration entries and reentries, so calling immigrants “criminals” can be misleading. And I asked him if he knew that, on the border, defendants were pleading guilty and being sentenced in proceedings that could involve forty or more defendants, all standing in front of the same judge—who struggle to keep their names, charges, criminal histories, and personal circumstances separate. We did not discuss whether reentry should be a crime. Rather, we talked about how this country delivers justice and about the process it provides to persons in its custody. On that question, we were in general agreement. As the man said, before we let the subject drop, “well, it shouldn’t be like that.”

I suspect if I ran across the same man again, he would concur with some—or all—of the Trump Administration’s goals at the border. The President, and many of those who voted for him, want tighter borders. They are not wrong that increasing numbers of immigrants, many accompanied by children, are seeking asylum from countries south of the United States. Further, the number of immigration prosecutions has increased significantly. For example, the number of Chapter 8, Section 1325 United States Code charges has increased from 15,461 in 2004 to 80,886 in 2019.

Mexico, and, in winning the 2016 election, the President won the right to pursue policies that seek to stem those numbers. Nor, is the current administration the first to attempt to raise higher and more formidable walls (metaphorical and literal) between this nation of immigrants and those immigrants who seek refuge here.

For example, both Presidents George W. Bush and Barack Obama relied on punitive consequences—especially increased discretionary removals and criminal prosecutions for entries and reentries into the country—to regulate and restrict immigration. President Bush dramatically increased prosecutions of even first-time crossers at the U.S.–Mexico border after the September 11, 2001 attacks on the World Trade Center.

special detention centers in order to deter families from seeking asylum in the United States.22

This is something I try to remember when talking to friends, colleagues, and students about the border—some of what we are seeing is about winning and losing in a democratic system.23 Citizens play their role in that system when we vote, and when the system is working there are procedural checks along the way to keep our elected representatives more or less in line.24

But I wondered, as the family-separation crisis progressed, how the man on the train would feel about how the administration was pursuing its goals.25 Its implementation of the now-abandoned Zero-Tolerance Policy produced some of the most striking stories and visual images from President Trump’s presidency—children sleeping on concrete floors, under foil blankets; family reunions that were not joyous, but instead marked by anger and hostility from young children who felt betrayed by the people they had trusted most; cautionary words from pediatricians and mental health professionals about the long-lasting effects of the separations; and debates in court about whether the government was required to provide toothpaste to children in its custody.26 Those images

President George W. Bush focused on the problem of minors crossing the border without their parents and signed a law unanimously passed by Congress that called for such “unaccompanied minors” to be released into the “least restrictive setting.”

addressing and deterring unlawful immigration—a criminal track and a civil track.29 Thus, a person who enters the country unlawfully may be placed in civil removal proceedings or may be criminally prosecuted.30

Moreover, as the Supreme Court recognized in Padilla v. Kentucky, a criminal conviction in state or federal court can result in a person’s removal.31 For that reason, the Padilla Court held that a criminal defense attorney’s obligation to provide effective assistance of counsel includes the obligation to provide correct advice about the immigration consequences of a guilty plea.32 But Padilla, while significant for recognizing the seriousness of removal, is slim protection for immigrants in criminal proceedings.33 Padilla requires only that defense counsel apprise clients of the certain (or near-certain) immigration consequences of a guilty plea.34 It does not require a criminal defense attorney to “jump

See Stumpf, supra note 28 at 380–81 (explaining how, because of changes made by legislators on the two fields, both criminal and immigration law are so comINGLED with each other that a person who came into the country illegally can either be deported or be sent to jail if they violate an immigration law that is also a criminal law).

The Trump Administration’s Zero-Tolerance Policy exploited the gap between civil and criminal immigration law.36 Before the policy was implemented, when an immigrant accompanied by a child was found entering the United States unlawfully—at a point other than an official port of entry—and made an asylum claim, the Customs and Border Protection’s (CBP) policy was to place the families in civil asylum proceedings.37 Parents and their children were detained together and were often released while they awaited a hearing on their claims—the “catch and release” policy the President has often criticized.38 Under the Zero-Tolerance Policy, officers arrested and United States attorneys prosecuted all persons who crossed illegally—whether or not the individuals asserted an asylum claim and whether or not

they were crossing with minor children.\textsuperscript{39} This decision triggered separations.\textsuperscript{40}

The administration was, of course, entitled to make this choice.\textsuperscript{41} But the decision of which route to take had significant procedural consequences.\textsuperscript{42} Before the Zero-Tolerance Policy went into effect, when an asylum-seeker was put into civil proceedings, she was not entitled to an attorney at the government’s expense.\textsuperscript{43} Chances were good that she would not be detained for a lengthy period of time.\textsuperscript{44} Her asylum claim would be heard.\textsuperscript{45} And, importantly, if she entered with a child, the family likely would not be separated.\textsuperscript{46}

When an asylum-seeker is charged with a crime, however, she is entitled to the significant constitutional protections afforded to all criminal defendants, including a court-appointed attorney.\textsuperscript{47} But she will almost certainly be detained without bail.\textsuperscript{48} Her asylum claim will be addressed after the prosecution, or not at all.\textsuperscript{49} She will be separated from her children.\textsuperscript{50} In this context, the administration’s choice to pursue criminal prosecutions inevitably exacted great harm.\textsuperscript{51}

The administration knew that it would cause harm.\textsuperscript{52} Months before news of the Zero-Tolerance Policy exploded into the national media, the administration took it for a test run in El Paso, Texas.\textsuperscript{53} In spring 2018, immigrants appearing in federal criminal court there began reporting that

The fact that the children could not be located was a procedural lapse exceeding comprehension.\textsuperscript{59} It was unfathomable that a child in government custody could simply be lost.\textsuperscript{60} Yet, whether or not the

government intended this consequence, we know that it expected it.61 The Department of Homeland Security (DHS) knew, as it put the Zero-Tolerance Policy into effect, that defects in its information technology systems would make it impossible for it to keep track of the separated children.62 The Department implemented the policy anyway.63

El Paso’s criminal defense attorneys, federal judges, and federal magistrate judges witnessed firsthand the anguish caused by these separations, but their efforts to address that anguish would prove unsuccessful.64 United States Magistrate Judge Miguel Torres was among the first to try.65 In a June 2017 bond hearing for a man accused of unlawful reentry into the United States and separated from his child at arrest, Judge Torres lost his temper when the government had no answers regarding the whereabouts of the child.66 After asking repeatedly for information about children in shelters, Judge Torres slammed his hand on the bench and said, “I can’t understand this. If someone at the jail takes your wallet, they give you a receipt. They take your kids, and you get nothing? Not even a slip of paper?”67

If I have no authority, I have no authority and that’s that.”\textsuperscript{73}

As it turned out, the defendants’ criminal proceeding was a woefully inadequate forum.\textsuperscript{74} On the separation front, the defense attorneys were unable to get answers even as to what should have been the easy questions: where the children were and how best the parents could reunite with them.\textsuperscript{75} An attorney representing a parent in a reentry case described an encounter with a client who wanted to know where her son

was. The attorney could not answer because the people at the end of the 1-800 number the Office of Refugee Resettlement (ORR) provided had no answer. The attorney later recalled, “she stared me in the eye, indignant. ‘Why don’t you know? . . . You’re my lawyer.’”

Sergio Garcia, the attorney appointed by Judge Torres, was also not able to identify legal arguments regarding the separations that found any purchase in the immigrants’ criminal proceedings. He advanced mainly due process arguments, contending that the government had engaged in outrageous conduct by separating parents from their children in violation of the Due Process Clause—DHS’s own policies—and the 1997 Flores Settlement Agreement that governed treatment of unaccompanied immigrant children. He also argued that, with no knowledge of where the missing children were, he could not satisfy his ethical obligation, under Padilla, to advise his clients of the immigration consequences of any plea. In spite of his early concerns, Judge Torres rejected each of these arguments.

A single conclusion led nearly inevitably to all the rest—the government was entitled to place the asylum-seekers in criminal proceedings rather than civil ones. And, once in criminal proceedings, the government had no obligation to even find out where the children were. While the parents may have due process rights to receive information about their children, those rights did not affect the central question in their criminal cases: whether the defendants had entered the United States without authorization.

The court found no evidence that the separations were being used to “purposefully try to coerce a guilty plea or gain a litigation advantage—indeed these defendants did not plead guilty.” It rejected the defendants’ argument that Padilla had any application. Judge Torres recognized a potential role for the decision: “who can doubt,” he queried, “that the immigration consequences and any possibility of seeking legal relief for their minor children who accompanied them would not be a critical, if not determinative consideration” in the defendants’ decisions regarding a plea?

But, Garcia was operating in an information vacuum, uncertain about what options were available to his clients as rules and policies regarding asylum claims shifted daily. There was no basis to conclude that he was misadvising his clients or doing anything other than what

Judge Torres had appointed him to do. 91 Unable to point to a specific deficient performance, the claim regarding the plea became, as the district court recognized in adopting the magistrate judge’s decision, an incognizable claim that the defendants had “a right to enter a guilty plea.”92

In the end, District Judge Cardone concluded it was not her place to decide the wisdom of the Zero-Tolerance Policy; she merely had to decide whether it violated any rights inherent in a criminal trial.93 She concluded it did not.94 Within two months of Judge Cardone’s decision, four of the defendants were removed to their home countries—without their children.95 According to attorney Garcia, the families have not yet been reunited.96

The district court and Fifth Circuit Court of Appeals affirmed both Magistrate Judge Torres’s and District Judge Cardone’s decisions—in opinions that further underscored the poor fit between the separations and the criminal courts.97 In those courts, the defendants made additional arguments, contending that their children had been material witnesses in their cases and that therefore, the government was required by the Sixth

Amendment to produce the children at trial.\textsuperscript{98} Had the defendants sought answers about their children in civil proceedings, they would have been entitled to discovery.\textsuperscript{99} In criminal court, of course, the right to discovery is limited.\textsuperscript{100} The defendants’ ability to compel the presence of witnesses depended on their ability to demonstrate their necessity.\textsuperscript{101} And the court of appeals, in a somewhat surreal twist, gave another reason for rejecting the argument: the defendants had not sought the children through subpoena.\textsuperscript{102}

Of course, the parents (and their attorneys) did not know where the children were, had been told the children would not be produced, and, as the defendants’ attorney pointed out, they had been told throughout the proceedings that the government had no obligation to locate them or bring them to court.\textsuperscript{103} These criminal proceedings made the children’s presence difficult for parents in another way: bringing them only to testify would mean disrupting their lives, forcing them to see their parents in orange jumpsuits and shackles, and then sending them back to wherever they were being housed, again without their family.\textsuperscript{104}

Although the Zero-Tolerance Policy officially ended in October 2018,\textsuperscript{105} criminal defense attorneys on the border continue to grapple

with new policies that affect their clients.106 For example, a new policy permits border patrol agents to do “on the spot” DNA testing of immigrants traveling with children to identify “fake families.”107 An attorney told me of a recent case in which, minutes after conducting the test, agents informed an immigrant that the boy he was traveling with was not his son (the immigrant had produced a birth certificate), separated the two, and charged the adult with illegal entry.108 His attorneys doubt the DNA results but have been unable to get them through discovery and believe they would have a better chance of working out the separation issue in civil proceedings.109

Immigrants harmed by the Zero-Tolerance Policy who, after their criminal prosecutions, were able to secure paid or pro bono counsel have fared better.110 Indeed, the named defendant in Vasquez-Hernandez was assisted by a non-profit organization after her conviction and granted an immigration bond while she awaited a ruling on her asylum claim.111 Numerous lawsuits have been filed challenging the Trump Administration’s policies, and many have been, at least in part, successful.112 These successes correspond with data showing that, even

in routine immigration matters, represented immigrants are detained for less time and are more likely to obtain immigration relief than those without counsel.\textsuperscript{113} The Trump Administration’s efforts to end most immigration at the United States–Mexico border are by no means over.\textsuperscript{114} Deciding—probably correctly—that it cannot advance its goals through a legislative process with an intractably divided Congress, the administration continues to act through executive orders and changes in agency policy.\textsuperscript{115} Its most recent efforts have transformed the way in which asylum claims at the border are handled.\textsuperscript{116} Those efforts include a “Remain in Mexico” program, requiring asylum seekers from Central and South America to await their proceedings on the Mexican side of the border;\textsuperscript{117} a rule prohibiting applications from asylum seekers who pass through another country, other than their own, on the way to the United States;\textsuperscript{118} expediting and streamlining consideration of asylum claims; limiting the number of people seeking asylum from Mexico;\textsuperscript{119} and prohibiting asylum for anyone who has not already been denied a request

in another country. The administration also tried to ban immigrants seeking asylum by limiting the request to official ports of entry.

It may be, as it was with the decision to use criminal rather than civil proceedings for asylum-seekers, that the executive branch has the authority to do all these things. But, in pursuing its goals at the border, the administration is taxing, or expressly limiting, the structures and procedures in place that test that authority—among them, notice and comment periods for rule changes; access to lawyers; time to prepare a case; and the availability of courtrooms and judges. And its willingness to remove those protections is resulting in due process violations that demean the nation.

The administration is aware that the system has reached a breaking point; the signs are inescapable. At the most basic level, there are not...
enough bodies to deliver even basic due process guarantees. It is difficult to procure an attorney, and adequate access to counsel is complicated by distance to detention facilities. During the separation crisis, children as young as three years old were appearing alone in immigration proceedings. Even when asylum-seekers are able to obtain counsel, the “Remain in Mexico” program is making access to their attorneys difficult and, in some cases, impossible. But, just as it acted with the sure knowledge that it would not be able to keep track of the children separated during the Zero-Tolerance Policy, the administration continues to test the country’s ability to execute its immigration policies fairly.

For example, the “expedited asylum” program, an experimental program begun in October 2019, compresses an asylum claim into ten days or fewer by rejecting any person who cannot prove to an immigration official’s satisfaction that she has a credible fear of harm in
her home country.\textsuperscript{132} Individuals are permitted to speak with attorneys only by telephone and only in the twenty-four hours preceding their interviews.\textsuperscript{133} Without notice, the administration entered into agreements with Guatemala, Honduras, and El Salvador—permitting it to deport asylum-seekers not only to the countries they came from, but also to countries they merely passed through on their way to the United States.\textsuperscript{134} The administration is now experimenting with similar strategies designed to reduce the number of asylum-seekers from Mexico.\textsuperscript{135}

Perhaps the administration intends to dismantle procedural protections for immigrants at the border; perhaps not.\textsuperscript{136} But it has demonstrated a willingness to tolerate conditions that are, frankly, beneath even the least of this country’s aspirations for itself.\textsuperscript{137} Loose ends from the family separations alone include children who are still not reunited with their parents,\textsuperscript{138} and children, who though reunited, have suffered intense psychological harm.\textsuperscript{139} Ending the “catch and release” approach to asylum-seekers resulted in overcrowded detention facilities and a
